PROCURE MENTING

Web App | Contribute Data | Multi functions

www.linkedin.com/company/procurementing/
www.procurementing.com
Procurementing Ltd

Project Overview

Procurementing is a user-friendly tool that simplifies purchase orders, streamlines supplier management, and boosts productivity for small businesses. Key features include: Enhanced efficiency and optimized supplier management.

The Goals

Design the whole web app from A-Z in close to 2 weeks, with the goal of making the process of data input feel short of tedious, less, and more dynamic

Tools used :

Figma | Illustrator | Photoshop | Adobe Suite

My Role & Responsibilities

As the project, I collaborated with **Fazlul Ali**, taking on the role of a leader with responsibilities for ideation, concept development, and overseeing a moderately-sized team of designers. My role involved ensuring the project's success through effective leadership.

My primary focus was to maintain efficiency in team coordination among experts and timely delivery of the project according to set timelines.

Web App | Inventory Management Tool

Web App & Admin Panel

Project Overview

MOMANS is a high-capacity grocery & cake retail shop for restaurants, wholesalers, & retailers. It manages the entire inventory lifecycle, from ordering to storage, customer requests, sales, & reporting, ensuring smooth operations.

The Goals

- Create a user-friendly interface for managers to track vendor shipments, manage inventory, and process customer requests efficiently.
- Ensure real-time inventory updates to prevent stock discrepancies and optimize supply chain management.
- Provide detailed reports on sales, inventory turnover, and customer preferences to support data-driven decisions.

Tools used

Figma | Photoshop

My Role & Responsibilities

As the project lead, I designed the entire interface concept with a dark background that enhances visibility and reduces eye strain during long hours of use. The design prioritizes ease of navigation, with color coding used to create intuitive interface hierarchy for user-friendly interactions.

I will also integrate the approved design into Figma and Flutter, ensuring seamless implementation. My role includes managing the project, the concept and design, and ensuring communication is clear and on time.
